

AG300 ProPond

AG Probiotics Products for Agriculture

- Probiotics are living microorganisms that can be formulated into many different types of products for different application.
- Evidence showing probiotics can maintain a strong immune system. Probiotics also produce antibacterial biochemical substances that control, destroy, or kill pathogenic microorganisms.

AG300 ProPond:

Used by pond farmers with tilapia, carp, and catfish/pangasius, the PowerPond™ probiotic blend stabilizes the growing environment for the best harvest results.

Function:

- Improves Water Quality & Clarity
- Reduces Pond Sludge & Waste
- Increases Fish Production Yield

RECOMMENDED DOSING :

- Shock Phase (Before adding fish to water) 800 g / acre
- Stabilization Phase 400 g / acre (Weekly, for the first 5 weeks)
- Maintenance Phase 200 g / acre
- (Weekly, until complete water change)
