

AG400 ProHatch

AG Probiotics Products for Agriculture

- Probiotics are living microorganisms that can be formulated into many different types of products for different application.
- Evidence showing probiotics can maintain a strong immune system. Probiotics also produce antibacterial biochemical substances that control, destroy, or kill pathogenic microorganisms.

AG400 ProHatch:

Designed specifically for hatchery conditions. ProHatch protects against diseases and helps with food digestion during the sensitive early days of growth.

Function:

- Eliminates Pathogen Food Sources
- Reduces Water Changes Needed
- Improves Larvae Yield & Quality

RECOMMENDED DOSING :

- Pre-Dose 16g / m3
Before adding larva to fresh water
- Stabilization Phase 16g / m3
Every 4 Days, until water change
